

Campus Resource Management

Campus Reserve is a browser prototype for finding campus spaces, requesting reservations and tracking permission decisions.

Submitted by:

Submitted to : Mr. Jeelani Asif

Main features and use cases

Shared availability and local notifications connect the booking workflow.

Student / society

Browse room availability, submit a reservation, track its status and cancel when needed.

Permission in-charge

Inspect pending requests and record approval or rejection with review details.

Campus administrator

Add or update room and society records through dedicated management screens.

Technology stack

Interface and tooling

React 19 and TypeScript 6

Vite 8 and React Router 7

Tailwind CSS 4 and Lucide React

Data and application logic

Browser localStorage stores demo records.

A TypeScript service manages bookings, overlap checks and notifications.

Current scope: frontend prototype with demo personas and no backend database.

Prototype workflow and architecture

Find your *space*.

Step 4 — Select Room in Lecture Theatres Complex (LT)

Select an available hall or studio. Availability flags update dynamically.

4 room(s) listed

LT-101 (Tiered Lecture Hall) · Available

Capacity: 280 · Ground Floor

Dual Projectors · Wireless Mic · AC · Tiered Seating · Podium

ID: LT-101 · Selected

LT-102 (Lecture Theatre) · Booked

Capacity: 200 · Ground Floor

Projector · Sound System · AC · Tiered Seating

ID: LT-102

LT-201 (Smart Seminar Theatre) · Available

Capacity: 150 · First Floor

Smart Interactive Board · AC · Mic System · LAN Ports

ID: LT-201

LT-202 (Lecture Theatre) · Pending

Capacity: 150 · First Floor

Projector · AC · Mic System

ID: LT-202

← Previous

Continue to Time Slot →

1. Select

Choose a room, date and available time slot.

2. Request

Complete the eight-step form and review details.

3. Validate

Check timing, conflicts and night permission.

4. Review

Save as Pending, then approve or reject and notify.

4

Conclusion and future scope

The prototype demonstrates room discovery, request submission and review.
A campus-wide service needs the additions below.

Verified identity

Institutional sign-in and server-side authorization.

Shared database

Synchronize bookings across users and devices.

Reliable booking rules

Atomic conflict checks and a decision audit trail.

Campus validation

User testing and targeted notification delivery.
